Section 2: The Project

to be filled by the external supervisor

2.1. Project Description: *Please provide a brief introduction of the project including its scope.*

This project involves the design and development of a bilingual (English/Urdu) Mortuary Management System for JDC IT CITY. The system will consist of two main portals:

1. A public-facing booking portal where families/users can register and schedule body washing (ghusl), burial slots, and transport services.
2. An admin dashboard where staff can log in, view booking requests, confirm or reject them, assign services, and manage records.

The scope of the project includes user authentication, booking management, service scheduling, multilingual UI switching, notification handling, and a reporting module. The website is expected to be completed within approximately 40 hours of development spread across 20 days.

2.2. Expected Deliverables: *Please list the expected outcomes at the end of this project, e.g. a working prototype of the solution, a report, or the expected contribution to be made by the participant(s).*

- Fully functional bilingual web portal (English/Urdu) with language toggle.
- Public user registration & login with booking request form for mortuary services.
- Admin dashboard with booking confirmation/rejection workflow.
- Service management module (ghusl, burial slots, transport, graveyard booking).
- Notification system for booking status updates.
- Reports & analytics panel for admin.
- Responsive design compatible with mobile and desktop devices.
- Source code and project documentation.

2.3. Planned Schedule: *Kindly list the start/end dates and the timeline for the achievement of any intermediate milestones.*

Days 1–3 (Approx. 5 Hours): Requirements gathering, project planning, and initial system setup.
Days 4–10 (Approx. 15 Hours): Frontend development including public portal, authentication, and bilingual language switching.
Days 11–16 (Approx. 12 Hours): Backend development including admin dashboard, booking management, and service workflows.
Days 17–20 (Approx. 8 Hours): Integration, testing, bug fixing, and final project review.
Total Estimated Development Time: Approximately 40 hours over 20 days.

2.4. Modus Operandi: *Kindly explain the mode of operation i.e., how often and for how long should the student should visit your site, can they work remotely, how you will supervise them*

The student will work in hybrid mode. Progress updates will be conducted after every 10 days, and if required, on-site visits will be scheduled for requirements review, feedback sessions, and progress demonstrations. The remaining work will be carried out independently with regular communication through WhatsApp/email with the external supervisor. The supervisor will review deliverables periodically and provide feedback accordingly.

2.5. Comments: *Kindly mention any special requirements you expect and/or any comments you might have.*

The student is expected to have working knowledge of web development. Urdu and English mode switching should be implemented accurately to ensure a smooth and user-friendly experience across the application..
